

WHO WE ARE

ABOUT US

Each region and city in Japan has a typical ramen dish that is usually used as a tourist attraction. The tradition of local ramen dates back to attempts to revitalize the local economy in the 1980s. One is to promote the individuality of ramen from all over Japan.

Red Light Therapy

Red light therapy is a low laser therapy using natural wavelength of light for therapeutic benefits – cosmetic and medical. It is a combination of light-emitting diode (LED) that emits infrared light and heat. It is a simple, non-invasive treatment. Clients love this modality and are experiencing the benefits from each relaxing treatment.
